

# Doozer Wood

Eco-friendly product

## Classic Series

"Follow the rule of earth"

The Classic Series is the main product in the market currently. Although its surface doesn't have wooden grain, its simplicity is favored by many peoples. In addition, this series of products may be similar to the other suppliers, but in fact we have been making a great effort at "anti-fading" and "anti-bacterial" qualities. Doozer calls this "classic" series!

You can see that **Doozer wood (WPC)** in anywhere, it can be around by your side!

The Doozer wood of eco-friendly recycling WPC, it has a high durability as it can sustain in strictly environment. Such as bridges under rivers, walkways in forests there can be feel freely, crowded streets, campsites ... etc; many places can be built. It can be used with easily for a long time without worrying too much about protective coating and maintenance.

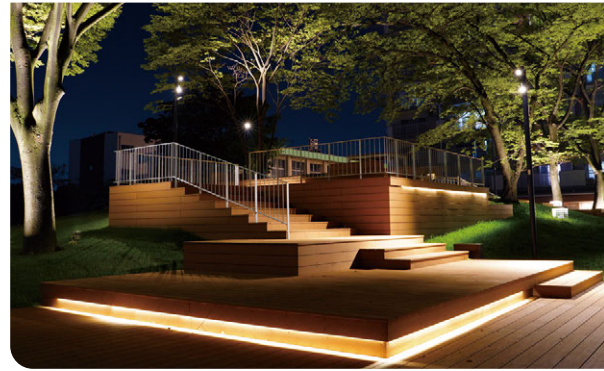

**Green Products**

**Our products are green building materials and eco-friendly!**

Our products are safer and more environmentally friendly!  
WPC looks like natural wood, but its characteristics are completely different and more durable "Doozer Wood" uses a blending ratio of 50% waste wood fiber powder, which is closer to the texture of natural wood.  
It is different with natural wood, without the biggest disadvantage of using natural wood: continuous maintenance due to corrosion and decay, increased use new wood, causing the burden of cutting down green forests and affecting the environment and ecology.  
"Doozer Wood" is the best environmentally friendly green building material for recycling.

**TIMBER SUBSTITUTE**
