

Doozer Wood

Eco-friendly product

Natural Series-N1

"Natural grain pattern"

We use post-process production techniques for the surface treatment: The online embossing has coordinated the natural color with mixture. These engineering techniques contribute to the wood grain with 3D and natural achievable, and increase the anti-slip effect.

You can see that Doozer wood (WPC) in anywhere, it can be around by your side!

The Doozer wood of eco-friendly recycling WPC, it has a high durability as it can sustain in strictly environment. Such as bridges under rivers, walkways in forests there can be feel freely, crowded streets, campsites ... etc; many places can be built. It can be used with easily for a long time without worrying too much about protective coating and maintenance.

Is our product waterproof?
Is it suitable to install in area with water?

"Doozer Wood" is an eco-friendly recycled product that has excellent performance with low water absorption. It has much better lower water absorption than timber which greatly reduce the possibility of soaking and decay over a long period of time. Our WPC products are ideal for installation in water areas, such as ressort by the sea, hot spring area, swimming pool, lakeside, shore boardwalk at the marina and sundeck.

LOW WATER ABSORPTION

Green building materials to embrace the pure life of nature

We applied a new technology at "on-piece molding embossing" with color mixture for wood grain more nature and stereoscopic. It is creating a different level of sensory with a unique appearance and characteristic. Absolutely this is a best choice at Doozer Wood for customers who asking for the budget limited and ideal presentation. This series have been most popular in the markets such as UK and Taiwan, often sold out of their stock.
